## Projects

### K-xyz Shopping ([Link](#))

Sept 2024 – Oct 2024

**Tech Stack:** React.js, Redux, CSS, HTML, Tailwind.

**Description:** Developed a fully responsive e-commerce website using modern web technologies, including React for the front-end. Focused on creating a visually appealing and intuitive interface, ensuring compatibility across various devices and browsers. This project improved my skills in web development, UI/UX design, and agile project management.

### K-Books ([Link](#))

Jul 2024 – Aug 2024

**Tech Stack:** React.js, Node.js, Express.js, CSS, HTML, Tailwind, MongoDB.

**Description:** Developed a dynamic book review platform utilizing React.js for the front end and Node.js with Express.js for the back end. Designed a responsive user interface with HTML, CSS, and Tailwind CSS, ensuring a seamless experience across devices. Utilized MongoDB for data storage and management, integrating a RESTful API for smooth data retrieval. This project enhanced my skills in full-stack development, API integration, and modern UI/UX design.

### Stock Price Prediction ([Link](#))

Feb 2024 – Apr 2024

**Tech Stack:** Python, NumPy, Pandas, Matplotlib, Scikit-learn (sklearn), Jupyter Notebook.

**Description:** Developed a predictive model to forecast Google stock prices using historical stock data from 2012 to 2016. The project involved cleaning, pre-processing, and scaling data, followed by building a deep learning model based on LSTM (Long Short-Term Memory) to predict future stock prices. Successfully predicted stock price movements with a relatively low loss and demonstrated the potential of LSTM for time series forecasting in financial data.
